Identify the Transformation In these worksheets identify the image which best describes the transformation (translation, reflection or rotation) of the given figure. Ideal for grade 5 and grade 6 children. Write the Type of Transformation Each grid has the figure and the image obtained after transformation. Write, in each case the type of transformation undergone. Recommended for 6th grade and 7th grade students. Transformation of Shapes Translate, reflect or rotate the shapes and draw the transformed image on the grid. Each printable worksheet has eight practice problems. Transformation of Triangles Draw the transformed image of each triangle. The type of transformation to be performed is described above each question. Transformation of Quadrilaterals Let the high school students translate each quadrilateral and graph the image on the grid. Label the quadrilateral after transformation. Transformation: Any Two of Three Two types of transformation have been performed to each figure. Middle school children should choose the correct transformations undergone. Write the Rules Identify the transformation undergone by the figure and write a rule to describe each of them. Writing Coordinates: With Graph Perform the required transformation for each figure and graph it. Also write the coordinates of the image obtained. Suitable for 8th graders. Writing New Coordinates The coordinates of the figure are given. Write down the coordinates of the vertices of the image after transformation. Add-On Practice Worksheets Allow children unconditional access to this ensemble of free transformation worksheets and equip them with every detail that matters in transformation. No matter how the figure is: slid, flipped, or turned, we have it all covered here and at such easy pace that children would get acclimatized to the whole thing in a jiffy. What's more, thanks to the wide-ranging and multi-grade exercises incorporated here, students get a masterful insight into the three transformations - rotation, reflection, and translation of shapes.
